### **CURRICULUM VITAE**

### **Ripon Kumar Roy**

Scientific Officer
Biotechnology Division
Bangladesh Rice Research Institute (BRRI),
Gazipur, Dhaka, Bangladesh.

E-mail: riponkumar1983@yahoo.com

Mobile No.: +88-01719593302

Division, Bangladesh Rice Research Institute

(BRRI), Gazipur-1701, Bangladesh.

**Date of Birth** : 16 July, 1983

Nationality : Bangladeshi

Sex : Male

**Religion** : Hindu

Marital status : Married

# **Educational qualification**

| Degree             | Board/University                  | Class/ Grade       | Year of |
|--------------------|-----------------------------------|--------------------|---------|
|                    |                                   |                    | passing |
| MS (Genetics &     | Bangabandhu Sheikh Mujibur Rahman | CGPA 3.82 out of 4 | 2009    |
| Plant Breeding)    | Agricultural University           |                    |         |
| B.Sc. Ag. (Hons.)  | Patuakhali Science and Technology | CGPA 3.79 out of 4 | 2007    |
|                    | University                        |                    |         |

| School Certificate |                                   |                    |         |
| Secondary School   | Jessore                           | First              | 1999    |
| Certificate        |                                   |                    |         |

Job Experience

I served as a Scientific Officer in a project entitled "Strengthening and Capacity Building of

Biotechnology Laboratory in BRRI" at Biotechnology Division in Bangladesh Rice Research

Institute (BRRI), Gazipur from December, 2008 to April 2010. During that period I was involved in

anther culture of rice for development of stress (drought and salt tolerant) rice varieties.

Now I am working as a Scientific Officer at Biotechnology Division in Bangladesh Rice Research

Institute (BRRI) from 6 May, 2010. My job responsibilities is development of rice variety for

favourable and stress (Salinity and Drought) ecosystems. In this service period my work

experiences are listed below.

1. Development of stress (Salinity and Drought) tolerant rice varieties through anther

culture.

2. Screening BRRI released rice varieties and germplasm for salinity tolerant at

seedling stage.

3. Field performance evaluation of anther culture derived lines at saline and favourable

ecosystem.

4. Characterization of BRRI released rice varieties through an integrated (molecular

and morphological) approach.

5. Development of stress (drought and salinity) tolerant rice varieties by integrating

TPSP, GlyI and GlyII genes in BRRI dhan29 through agrobacterium mediated

transformation.

6. Development of bacterial blight resistant rice variety through Marker Assisted Back

Cross Breeding (MABC).

Other relevant experience

Data analysis: I have practical knowledge to operate MStatC, Genstat, IRRISTAT,

AlphaEaseFC, GGT. OGene, Power marker, Primer3. NTSyspc, **Bioedit** 

software for data analysing and interpreting.

**Bioinformatics tool use:** I know how to use BLAST and ClustalW.

#### **Publication**

#### A. Research Article (Published as full length paper)

- 1. Ansari A., A W Julfiquar., M G Rasul., **R K Roy** and R R Majumder (2010). Assessment of variability of out crossing and yield trials in cytoplasmic male sterile lines of hybrid rice (*Oryza sativa L*). *Eco-friendly Agril. J.3* (2):84-88.
- 2. H Begum., M A Motalib., A Akter., M U Kulsum., **R K Roy** (2013). Wild species identification using morphological markers. *Eco-friendly Agril. J.6* (01):13-16-88.
